ET-RX-13 is ASK Superheterodyne Wireless Receiver Module working in ISM band. It can directly connect to MCU I/O or the Data Input Port on wireless decoder chip. Easily fulfil the function from Wireless signal to Data Receiving.

ET-RX-13 can work with several module (one transmitter module and several receiver module) at the same time, and have no interference to each other, and don’t influence the receiving distance.

**NOTE:**

ET-RX-13 Drive Current from Data-PIN is weak, if directly connection with Driving Chip which I/O can not connect Pull Up Resistor or Pull Down Resistor, Driving Chip inner Pull Up Resistor and Pull Down Resistor turn to Disabled State.
